

# Agricultural support

**SRPC collects the sensor information such as soil moisture, temperature and humidity, trap sensor, concentration of CO<sub>2</sub>.**

**It improves efficiency in Greenhouse monitoring and Agricultural Productivity.**

Sensor information such as soil moisture, temperature, humidity, soil PH · CO<sub>2</sub> can be viewed on the web. The web view provide means for storing Logs, data analysis and graphical presentation of real-time data.

At the time of emergency such as temperature is extremely high, the moisture content is low, the animal is caught in a trap, sms/mail notification will be sent out instantly. This will help to reduce the burden of farm work and increase crop productivity.
